SUBJECT INDEX

ABH antigens
in human embryonal development 752
Absorbing cells
surface specializations of 75
Acetylcholinesterase
gold-thiolacetic and -thiolcholine method of localization 703
in motor end plates 703
Acetylation
effect on acid dyebinding 15
Acrolein
preferential binding to nuclei 30
Acyl naphthylamides
enzymes hydrolyzing 117
trihalogen derivatives 117
Adenosine triphosphatase
in ciliated respiratory epithelium 677
in mitochondria of human cells 647
in pinocytic vesicles 713
with formaldehyde, glutaraldehyde and hydroxyadipaldehyde fixation 191
Adrenal medullary cells
of the marmoset 595
Adrenergic fibers 282
Aerobic growth 344
Alcian blue
mechanism of staining 29
binding to tissue polyanions 30
Alcohol dehydrogenase 431
Aldehyde-fuchsin
demonstration of β cells 328
Aldehyde fixation
effects on acid phosphatase activity 476
Amino acid β-naphthylamides
enzymatic hydrolysis of 57
3-Amino-9-ethylcarbazole
demonstration of peroxidase 150
Aminopeptidase
cytochemical demonstration 705
fixatives and substrates for 503
Ammoniacal silver
staining and protein extraction 721
Amyloid
stained with congo red 693
Announcements 74, 247, 422, 526, 608, 770
Antibody
labeling with organic mercury 684
Araldite
use with fluorescence method 518
Aryl sulfatase
localization of 711
Autoradiography
assessment of proteolylic enzymes 34
histo- 148
localization of lipid- and water-soluble compounds 38
localization of phosphorylase 148
of diffusible ions 390
Azo dye method
demonstration of acid phosphatase in leucocytes 714
Bacterial phagocytosis 12
Baker's chromate reagent
with lipids 410
Bone
cement lines 270
induction by bladder epithelium 255
Book Reviews
Glick: *Quantitative Chemical Techniques of Histo- and Cytochemistry* 759
Graumann and Newmann: *Handbuch der Histochemie, Band V Lipide* 759
Montagna and Lobitz (Editors): *The Epidermis* 414
Pease: *Histological Techniques for Electron Microscopy* 760
Preece: *A Manual for Histologic Technicians* 414
Provenza: *Oral Histology: Inheritance and Development* 415
Sandler and Bourne (Editors): *Atherosclerosis and Its Origins* 143
Sandritter and Kasten (Editors): *100 Years of Histochemistry in Germany* 305
Bromoindoxyl acetate method
demonstration of esterase 297
pH variable 297
Bromsulfalein
as stain for protein 708
Carboxylic acids, thiol-substituted 611
Catecholamines
demonstration of 518, 147
fluorescence method with 518
uptake by adrenergic fibers 282
Cholinesterase
in cardiac muscle 6
in duck skeletal muscle 559
electrophoretic studies 10
in normal and ulcerated stomach of rat and man 216
Collagen
staining with Luxol fast blue G 133
Complex formation
between heavy metals and thiolactic acid 566
carbohydrate-protein in snake venom glands 715
Computer
simulation of enzyme kinetics 707
Crypt epithelium
of mouse duodenum 524

Cyanophyceae
absence of histone 298
Cystic fibrosis
epithelial mucins in 28
Cytochrome oxidase
cyanide sensitivity 239
formalin resistance 239
peroxidase interference 300
in central nervous system and spinal cord of rat 706
in ciliated respiratory epithelium 677
in plant cells 701
Dehydrogenases
in buffers 541
in hamster and rabbit eggs 720
in kidney 533
in polyp and carcinoma of rectum 718
in skin of Rhesus monkey 668
localization of 3α-hydroxysteroid-d. 701
malate d. isozymes 510
phenazine methosulfate with 408
pyridine nucleotide dependent 700
succinic, in ciliated respiratory epithelium 677
TPN-linked L-hexonate in mammalian kidney 533
Demyelination 717
Deoxyribonucleic acid
demonstration by periodic acid-silver diamine method 694
in regions of X chromosomes 709
loss of purines during acid hydrolysis 13
pituitary in man 708, 720
stimulation of synthesis 710
Diamine
methods with mucosubstances 211
Diaphorase
in buffers 541
in formalin-fixed tissue 296
survival of activity after storage 296
Diffusion
extracellular and intratubular, of proteins 376
Dimethylsulfoxide
in preparation of smears 714
Disuse atrophy
presence of succinic dehydrogenase 265
Dopamine 484
differentiation from Noradrenaline 484
Dryers
small tissue 386
EDTA
decalcification with 303
Elastin
staining with Luxol fast blue G 133
Electron microscopy
demonstration of lysosomal aryl sulphatase activity 520
in complex formation study 566
quantitative cytochemistry 3
Electrophoresis
of acid mucopolysaccharides 27
of cholinesterases 10
of plasma and tissue esterases 713
separation of acid phosphatase and esterases 434
separation of esterases 249
Endplates
motor, acetylcholinesterase in 703
staining by lead nitrate 704
Eosinophil leucocytes 13
Erythrocytes
indophenol oxidase and peroxidase in 141
Esterases
bromoindoxyl acetate method for 297
effect of triton X-100 on 434
mammalian, study by Zymogram 339
quantitation in mouse plasma 249
plasma and tissue, study by electrophoresis 713
Ethionine
inducing pancreatic degeneration 21
Fixation
acetone 404
effects on tissue culture cells 310
for aminopeptidase 503
formaldehyde, glutaraldehyde and hydroxyadipaldehyde 191
formalin 286
Fluorescence
analysis of myogenesis 726
congo red as stain for amyloid 693
demonstration of monoamines 484
demonstration of uromucoid 155
demonstration of vitamin A 640
modification for catecholamines and 5-hydroxytryptamine 518
with Araldite as medium 518
with skeletal muscle phosphorylase 454
Fluorescent antibody technique
demonstration of uromucoid 155
with skeletal muscle phosphorylase 454
Formazans
mucosubstances converted to 702
Freeze-substitution
calcium in soft tissues 8
Freezing
effects on tissue culture cells 310
Gastric mucosa
normal and neoplastic in man 716
γ-Glutamyltranspeptidase 298
Glutaraldehyde
preferential binding to nuclei 30
Glycerol
and conservation of enzymatic activity 405
Glycogen
α-amylase digestibility of 720

Glycogen—*Continued*
identification in rat liver cells 715
removal from tissue sections enzymatically 488
Glycolysis
metabolites of, in retina 707
Glycoprotein
biosynthesis by testosterone propionate 361
in follicular cells of thyroid 31, 286
Glucosamine
inhibition of regeneration of neuraminate 716
Glucose 6-phosphatases in salivary glands of *Sciara coprophila* 168
Glucose 1-phosphate effect on liver phosphorylase 547
Glycosidases
effects of aldehyde fixation on 26
in ovary and placenta 396
β-Glucuronidase
post coupling technique for 441
response to testosterone 718
staining, affected by concentration, pH coupling factors 25
Gum-sucrose
storage in 296
Haematein
and PTA as single complex 18
use in visualizing phosphatase 235
Heavy metals
complex formation with thiolactic acid 566
HeLa cell and zinc binding, 365
Herpes simplex infection
of diploid human cells 717
Hexazonium pararosanilin 26
Histochemical Titles from Current Literature 65, 243, 416, 527
Histoenzymatic activities
conservation of 405
Histones
absence in *Cyanophyceae* 298
antigen induced changes of 19
extraction from *Necturus* and estimation 17
in lymphoid cells 19
solubility 318
5-Hydroxytryptamine, see *Fluorescence*
Immunofluorescence
of glomeruli in nephritis 350
Indophenol oxidase in mammalian erythrocytes 141
Indoxyl phosphate, as chromogenic substrate 10
Iron solutions, localization of acid mucosubstances 702
Isoproterenol
effect on cell proliferation 14
stimulation of DNA synthesis in rat 710
Isoenzymes
demonstration on acrylamide gel 10
malate dehydrogenase 510
KB cells, acid phosphatase transport in 712
Ketose reductase
demonstration of 24, 583, 700
effect of phenazine methosulfate 700
Kinetics
enzyme, computer simulation 707
of acetylcholinesterase 8
of Periodate-Schiff reaction 423
Lead nitrate, staining of motor end plates 704
Leukocytes
alkaline phosphatase in 11
eosinophil l. 13
γ-glutamyltranspeptidase in 298
Lipase, activity in pancreas 705
Lipids
and Baker's chromate reagent 410
autoradiographic localization of 38
in human sebaceous glands 498
neutral and choline-containing, simultaneous demonstration 571
Lysosomes
basic dye staining 20
hepatic, staining reactions 23
reversible activation 334
saltatory movement 713
staining by tetrazolium salts 411
Macromolecules
cytochemistry of functional groups 3
demonstration with TCH or TSC 629
microscopy of functional groups of 3
Mammalian glomerulus, enzyme staining reactions 22
Mammotropic pituitary tumor 182
Mannose inhibiting regeneration of neuraminate 716
Metachromatic staining
of catecholamine storage particles 706
with basic dyes 706
Microdensitometer, measuring pituitary DNA 708
Microspectrophotometry, two area method 161
Mitochondria
adenosine triphosphatase activity 647
demonstration of globular substructures 710
variation during aerobic growth 344
Monamine oxidase
demonstration with coupled peroxidatic oxidation 714, 604
Monoamines, differentiation between Dopamine and Noradrenaline 484
Motor end-plates, in duck muscle 559
Mucopolysaccharides
electrophoresis of 26
identification of 406
in snake venom glands 715
Mucosubstances
as complex formazans 702

differentiation with diamine methods 211
localization with iron solutions 702
Muramidase
activity in degenerating intestinal crypts of mice 716
Myocardium, phosphatase activity in 704
Myogenesis, *in vitro*, analysis 726
N-acetyl-β-glucosaminidase 355
Naphthol AS-BI-β-D-glucosiduronic acid, substrate for β-glucuronidase 441
Naphthol AS-BI N-acetyl-β-glucosamide as substrate, 355
Nauta-Gygax technique 206
Necrosis, *in vitro*, changes in hepatic microsomes and polysome 721
Neotetrazolium reductase, in buffer 541
Nephritis, differences in immunofluorescence of glomeruli 350
Nomenclature, sialomucins 518
Noradrenaline, differentiation from Dopamine 484
"Nothing dehydrogenase" activity and identity of 431
5′-Nucleotidase, specificity in mouse brain 657
Organic mercury labeling 684
Ovarian hormones, effect on sulphomucopolysaccharides 461
Paraformaldehyde
standardization of 147
demonstration of catecholamines 147
Periodate-Schiff reaction, kinetics 423
Peroxidatic oxidation
coupled, demonstration of monoamine oxidase 604, 714
demonstration of uricase 714
Perioxidase
3-amino-9-ethylcarbazole in demonstration of 150
in mammalian erythrocytes 141
in plant cells 300
interference with cytochrome oxidase localization 701, 300
Phenazine methosulfate (PMS)
in false localization of reactions 701
in demonstrating ketose reductase 700
Phosphatase
Acid phosphatase
after decalcification with EDTA 303
chromatographic separation 9
effect of Triton X-100 on 434
electrophoretic separation 8
in bile duct epithelium 240
in mouse duodenum 524
in gallbladder 240
in intrahepatic cholestasis 22
in leukocytes 714
in neutrophil granules 12
in thyroid follicle cells 687
transport following injury to KB cells 712
with aldehyde fixation 476
adenosine, in rat myocardium 704
and Wallerian degeneration 705
in rat sciatic nerve 705
Alkaline phosphatase
at pH 9, 7
demonstration on acrylamide gel 10
in leukocytes 11
in neutrophils 12
structural localization of nucleoside 34
visualization with mordanted haematein 235
Phosphoglyceride 690
Phospholipids
choline-containing 571
demonstration of, and neutral lipids 571
metabolism 113
Phosphomonoesterases, in brain tissue 125
Phosphorylase
activity in normal and dystrophic chickens 704
autoradiographic localization of 148
effect of glucose 1-phosphate on 547
effect of nutritional state on 553
in differentiating muscle fibres in fowl 719
in nerve tissues 721
in skeletal muscle 454
localization by fluorescent antibody technique 454
permanent preparations 605
Pinocytic vesicles, ATPase activity in 713
Pinocytosis and cell surface 92
Pituitary
β cells 328
DNA in human 720
uptake of steroids 31
Polysaccharides, relation to RNA in human brain 717
Postnatal development
enzyme activity in 44
Potassium transport 105
Proceedings
1964 Histochemical Society Meeting 2–35
1965 Histochemical Society Meeting 698–722
Prolactin in pituitary 182
Protease in bone after fixation and demineralization 404
Proteins
diffusion of, in rat testis 376
effect on phospholipid metabolism 113
histone and nonhistone 17
in pancreas 113
surface, in free tumor cells 27
Prothrombin synthesis, as hepatic function 740
Pseudomelanasis pigment, lipid nature in guinea pig 718
Purines random loss from DNA 13

Rabies, susceptible and refractory rats 515
Radioautography, identification of glycogen in rat liver 715
Retina, glycolysis in 707
Ribonuclease activity
of peripheral leucocytes 515
of serum 515
Ribonucleic acid, in human brain 717
Sakaguchi reaction 15
Saltatory movement of lysosomes 713
SDH, in mitochondria of rat 710
Section freeze-substitution technique 703
Sialomucin nomenclature 518
Skeletal muscle phosphorylase 454
Sodium transport 105
Sorbital dehydrogenase 24
Spinal ganglion cells, amino acids in 16
Steroids
adrenal and gonadal hormones 31
uptake by pituitary 31
Substrates, see specific name.
Substructure
globular, demonstration as result of SDH 710
Succinic dehydrogenase
in demineralized bones 23
in hamster and rabbit eggs 470
in pigeon pectoralis 265
Sulphomucopolysaccharides
of uterus 461
effect of hormones on 461
TCH and TSC, demonstration of macromolecules 629
Terminology, histochemical for carbohydrate-rich tissue components 599
Testicular hyaluronidase, identification of acid mucins 406
Testosterone, effect on β-glucuronidase activity of mouse kidney 718
Testosterone propionate, activation of glycoprotein biosynthesis 361
Tetrazolium salts
in demonstration of oxidative enzymes 4
in false localizations of reactions 701
staining of lysosomes and mast cell granules 411
Thiolacetic acid, complex formation with heavy metals 566
Thymus, changes after X-irradiation 32
Thyroid, glycoprotein in 31, 286
Thyroidal radioiodide 390
Thyrotropic hormone
stimulation within thyroid follicle cells 687
Tissue culture cells, effects of freezing and fixatives on 310
Tissue sections, removal of glycogen from 488
Triphosphopyridine nucleotide L-hexonate dehydrogenase, linked 533
Triton X-100
effect on acid phosphatases 434
effect on esterases 434
Ultrastructure
cytochemistry of cholinesterase 6
tubular, effect of fixatives on 719
Uricase
demonstration, histochemical 448
demonstration with coupled peroxidatic oxidation 714
Uromucoid
in human kidney stones 155
localization with fluorescent antibody technique 155
Uterus, sulphomucopolysaccharides of 461
Vaccinia virus, quantitative cytochemistry 3
Vitamin A
in rat adrenal 640, 707
fluorometric procedure for determination of 640
Wallerian degeneration 705
Water-soluble compounds, autoradiographic localization of 38
X chromosomes, DNA in 709
X-irradiation, enzyme changes in thymus 32
Zinc, binding of HeLa cell nucleolus 365
Zollinger-Ellison Syndrome 33
Zymogram method, study of mammalian esterases 339
Zymogram patterns of lymph after test meals 717
